
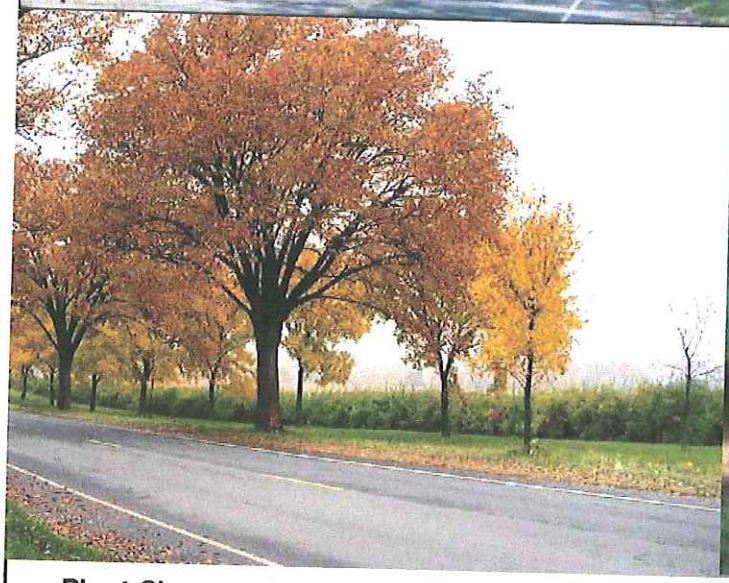
'Princeton' Elm
Ulmus americana 'Princeton"



- **Plant Characteristics**: These are large, graceful specimens with an upright vase-shaped habit.
- **Size:** Height: 60-80'
  Width: 30–40'
- **Foliage**: Large leathery dark green in summer, yellow in fall; great variation in intensity of fall coloration.
- **Flower:** Greenish red in spring.
- **Fruit**: Rounded, notched, disc-shaped samara, 1/2" long, maturing in May through June, Not ornamental.
- **Soil:** Prefers rich, moist soil.
- **USDA Hardiness Zone:** Zone 3-9
- **Light Range:** Sun to partial shade.
- **pH Range:** Good soil salt tolerance, pH tolerance.

- **Other:**
  - Easily transplanted because of shallow, fibrous, wide-spreading root system.
  - In the wild the tree is a common inhabitant of wet flats where standing water may accumulate in the spring and fall.
  - Vigorous and good resistance to elm leaf beetle and Dutch elm disease.
  - Grows 4-6 feet per year.
  - 95% survival rate from all causes.
  - Medium growth rate.
  - This elm is not a hybrid but a true American elm with a proven scientific record of Dutch elm disease resistance and longevity on the street.

Additional Information

SKU	1228
Botanical Name	Cercidiphyllum japonicum Red Fox
Type	Tree
New for 2012	No
Foliage	Deciduous
Dimensions	30' x 16'
Max Size	10' - 30'
Exposure	Full Sun
Soil	Evenly Moist, Well Drained, Acidic, Peat Moss Enriched
Misc Info	Suitable For Much Tighter Spaces
Height	30
Width	10

Exclamation™ Planetree (*Platanus x acerifolia*)

Origin: Hybrid of American Sycamore and Oriental Planetree

Mature Size: Large (>45' Tall)

Description: Exclamation™ Planetree is a large, fast-growing tree developed at the Morton Arboretum (IL). It has no serious pest or disease problems, and is tolerant to a wide range of soil conditions, preferring moist soils. It has an upright pyramidal form and strong central leader. The peeling bark develops attractive patterns as the tree ages Seed production is generally light. It has a relatively aggressive root system, and is not recommended for narrower tree lawns. Fall color is greenish yellow.

Rocky Mountain Glow® Maple

Acer grandidentatum 'Schmidt'

Zone: 4
Height: 25'
Spread: 15'
Shape: Oval
Foliage: Dark green
Fall Color: Yellow to orange-red

This slow growing relative of the Sugar Maple is native to the Rocky Mountains. It is similar to Sugar Maple, but both leaves and tree are smaller. Intense fall color.

Crimson Sentry Norway Maple

Scientific name: Acer platanoides 'Crimson Sentry'

Taxonomy

Family: Aceraceae
Type: Deciduous tree
Native: NO

Plant Requirements

Zone: 4 to 9

Plant Characteristics

Height: 25 ft
Width: 15 ft

Additional Characteristics

Trees
- [x] Small lot suitable
- [ ] Flowering tree
- [x] Safe for beneath power lines

Fruit
- [ ] Showy
- [ ] Edible

Leaves
- [x] Good Fall color
- [ ] Leaves fragrant
- [ ] Gold foliage
- [ ] Evergreen

Bark
- [ ] Showy

Wildlife value
- [ ] Attract hummingbirds
- [ ] Attract butterflies
- [ ] Attract birds

Poisonous
- [ ] Foliage
- [ ] Fruit

Description

Crimson Sentry' Norway maple is a bud sport of the common `Crimson King' Norway maple. It is prized as a small garden tree for areas where a much larger Norway maple would not be appropriate for space reasons.

Morphology:
This maple variant forms a dense, compact, upright tree with foliage that emerges as bright crimson and latter morphs to deep maroon during the summer. It has a very narrow canopy that may only attain 15' in width. Ultimately this tree may not reach over 25' in height.

Adaptation:
This cultivar is considered slow growing. None-the-less, its diminutive size is ideal for narrow streets and small yards. This species is very tolerant of a wide array of urban soils. It is considered drought tolerant.

Pests:
Powdery mildew is always a potential problem on the Norway maples that don't receive adequate air circulation. This cultivar does not seem to be as susceptible as Crimson King.
