

CITY OF TOLEDO

Construction Preview Community Meetings

What: A working session on construction projects this year will be held at six locations around the City (in each council district). Citizens will review information, ask questions, and provide input. This is the fourth annual series of meetings to improve communication with citizens about the street and utility repair and improvement process for our City.

Why: To engage citizens and discuss:

- Which streets are affected by the City's 2015 street and utility improvement program and how residents will be impacted by these projects;
- Who works to solve street and utility problems in Toledo and how to contact them if you have a concern;
- How street and utility repairs and improvements are funded;
- How streets are rated and selected for repair
- Future plans for improvements to our street and utility system

A G E N D A
