

**City of Toledo**  
**Basement Flooding Grant Program**  
**Program Contractor List** (Rev. 9/23/16)

You may use any contractor that is licensed for the type of work they propose, whether or not they are on the list below. The list below is for your convenience. The City makes no recommendation on any of these contractors. You may not disclose the bid of one contractor to another contractor.

A good proposal should:

- Explain the proposal and how it will work and be maintained, possibly with a sample in hand
- Included not just efforts to protect / isolate / elevate your basement sewer connections, but also include a new sump pump or changes to your existing sump pump to increase your protections. This may include separating your footer tiles from the sewer drain to a separate, dedicated sump pump crock.
- Discuss sewer lateral line maintenance issues (see brochure for more information). Cleaning / Root maintenance is not eligible expense. In some cases, tele-inspection of the inside of your line is eligible, such as prior to selecting a dinging point for an in-line check valve.

Keep in mind that many companies, regardless of the company's name, offer both sewer and plumbing work. However, in general:

- For in-line sewage check valves installed by digging a hole in the yard, talk to sewer contractors.
- For in-line sewage check valves installed by digging a hole in the basement, talk to plumbers.
- For a floor drain check valve or standpipe, no permit is required for these devices.

Company	Phone	Notes
---------	-------	-------

Very active in the grant program
